Would love to see a patch for GroupJive (www.groupjive.org). A lot of people use this along with community builder. At the moment there is not a stable release, but wanted to at least get it on the wishlist.

It looks good and the razor-sharp display retina seems even more luster. At the end of the day I put on my black iPhone 4, and now, the jailbreak for iPad 2 appears imminent, I will get another iPad 2 - in. Grrrrrr iPod to Mac The smart guy buys a product that he needs when he wants and doesn't sit around waiting with each generation. Such a foolish comment when people gloat about waiting. Apparently the smartest person buys nothing and waits forever. And I've had every iPhone revision so far (except the 3GS) ĩ½C and there was nothing wrong with iPhone first gen.
