
Problems with the User Group Manager

Posted by LeifH - 2007/12/21 15:01

Hi Guys,

i've got a problem with my User Group Manager.

If i select one of this groups, everything is fine. But for new groups i cant select values for any dropdown menu (ACO-Section, ACO-Value, AXO-Section and AXO Value).

My only opinion is NULL. Please help a noob like me.

Thanks....
