## Problems with CB

Posted by malik\_hemani - 2008/01/12 14:21

---

I installed CB 1.1 First. Than I installed JACLPlus 1.0.13. My Joomla Version is 1.0.13 Stable. After that I installed the patch for JACLPlus to work with CB. I than uninstalled the patch as told. I can see the new user group I created when I create a content but I cannot assign a user to the new usergroup in CB I created in JACLPlus.

In addition, I dont know if this is possible. When a new user registers on the site, JACLPlus creates a new usergroup based on the user's username and than automatically asigns the user in that usergroup...to the username and usergroup is the same. So for each user there is a usergroup. Each usergroup only has one user, its own!

I hope this makes sense. Please help as we are in time crunch and need to get this done!

Thanks

I got the first part working where i assign users to the new user group/level.

I am very much interested in the automation process for new uers to be added to new user group. Please help.
