
Cannot Create User

Posted by gofullon - 2008/01/17 04:47

Hi -

Using the latest JACLPlus installed cleanly (no other components) on a brand new test 10.13 stable system.

It will not let me assign a user to a group, saying I must be the Super Admin. I am the Super Admin.

I tried commenting out the lines 406 - 410 in the admin.users.php file, but that did not change anything.

Suggestions?

Thank you.

Rose

Same problem here!

I get this message when i try to create a user belonging to a JACL created group.

"you cannot create a user with this user Group level, only Super Administrators have this ability",

And, I was logged as "Super Admin" with admin user.

What's the problem? Anyone found a solution for this?

Replace line #651 of admin.jaclplus.php with

Code: :

```
global $database, $my, $acl, $_config;
```

Just comment the whole if verification on:

Line 407 of components/com_users/admin.users.php

Line 407 of administrator/components/com_jaclplus/patch/admin.users.php

i did it and i was able to add a new user under a new access level

thanx guys!

to pcarroll,
kindly elaborate your problems (i.e. details on the update and the php errors)

cheers!:laugh:

Ok i've made the changes mentioned in the previous post but when I go to the user admin page I get the following php error:

Parse error: syntax error, unexpected '}' in /var/www/html/internal/administrator/components/com_users/admin.users.php on line 515

So I comment out the '}' and it loads up the user admin page but its plain html with a php error at the bottom:

Fatal error: Call to undefined method stdClass::check() in /var/www/html/internal/administrator/components/com_users/admin.users.php on line 430

I comment this line out but then the page wont load at all.

have you commented only the if statements on

Line 407 of components/com_users/admin.users.php
Line 407 of administrator/components/com_jaclplus/patch/admin.users.php

you might have commented something else out.

If you like you can attach the files mentioned above and let us see where the problem might be...

cheers!:laugh:

Ok today is a confusing day for me. Ive just re-commented out the exact same lines I commented last time and its now deciding to work! I tried it 4 times last time making sure i wasn't being stupid and missing/adding lines

I'm going home :(
