
permission level issue

Posted by GREGHARKINS - 2008/02/17 14:55

We are running

1.0.12 joomla

1.0.4 fireboard

1.0.12 Jacplus

When we set permission levels they all work great. If we have a user at a high level and want to bring them down a level or 2 they are still able to see the higher level content... Anyone know why.

I have step up 5 levels for resting and 20 users and they all do the same thing.

I have dumped my cookies, history etc and even tested on 3 computers with no luck.

Can anyone shed some light on this please!!!!!!!
