
uddeIM's upcoming release 1.1

Posted by j0ly - 2008/03/04 22:20

Hi, uddeIM 1.1 is going to be released soon, and now has the ability to block certain groups from being PM'd, how hard would adding a hack for jACL in to this would it be? I have a client that is in need of this now, and is willing to pay some money to help motivate the hack!

Thanks
Scott
