
Header Image Change based on User Login??

Posted by rwallace - 2008/03/10 03:56

Hi,

I have installed Joomla 1.0.15 and JACL + Pro 1.0.15. Does anyone know if this is possible? I'm setting up an association website in which I'd like to have the web page header show as the "Association - State Name" (example) , however, when a person logs in, based on their user setting, i.e. if they are in the Kansas City Association, then I'd like for the Kansas City Association Logo or header to appear immediately after login. If they are in the Minneapolis Association, then the Minneapolis Association Header image appears.

Is this possible?

Would there be other components available that would allow this to work if not possible in JACL + Pro?

Appreciate anyone's assistance.

Rick
