Hi mescallo,

We will integrate more functions/enhancements into our new release for Mambo 4.5.3 ONLY. sections/categories enhancement definitely is one of them. If you need that function/enhancement please upgrade your Mambo to 4.5.3. However, we will re-consider it if some of you still need it for Mambo 4.5.2.3.

Hi, thanks for your soon answer, yes we need this enhance for mambo 4.5.2.3, we know that is so hard to maintain many versions but, this will help alot us,

Regards,
Marcelo Escallon

Hi roojin,

Enhance Backend Access Control For com_content is in MacPlus 4.5.3x and above only. As version 4.5.2.3 are old version and we don't have time to create a release for it now. We even don't have time to create a manual and MACLPlus for new version of Mambo 4.6.0 (still under development stage only) which are more important than others.
