## 1.0.15 New Section, category and Item

Posted by gabbo - 2008/04/06 03:38

---

Hi, iÂ´m new on this forum, and i have a small trouble with the new component JAACL Plus 1.0.15.

The problem is that since i Installed the component every time i create a new section and new category the items cannot be readed for the visitors to may site (when they are not logged) How can i change this, because the permissions are right, they have the access level "public" Somebody can help me?

Excuse my english..
