
pb component security images

Posted by destroy - 2008/04/25 16:22

Hello,

I have upgraded from my joomla 1.012 stable fr with JACLPLUS to joomla 1.015 .
I used the patch "joomla_1.0.12_to_1.0.15-stable-patch_package_jaclplus.zip" and it work fine but I don't have the security registry form with my component sÃ©curity image Version 4.2.0 (i have inserted security module in the files joomla.php and registration.php and registration.html.php)

can you help me ?

Hello,

Now my joomla 1.0.15 with JACLPLUS and sÃ©curity images work fine .

here the modified files .
