
Menu and administration part texts and links disappeared after install

Posted by Dunn Khan - 2006/01/11 19:53

Hi everyone,

First thanx for this hack, it seems to respond to what i was searching ... Good job ! ;)

But, as I said in the tittle, I can't use it as all the texts of the administration part and the links attached to them disappear just after the install (all the results were green by the way). It's really weird as I must use the Go back button of Firefox in order to find the install page and uninstall the hack.

I've got Mambo 4.5.2.3 Stable , under PHP 4.3.10-16 and Database version MySQL 4.1.14-Debian_6-log.

Hope you'll be able to help me !

See you,

Dunn Khan.

Hi Dunn Khan,

Please make sure you have used the right package for your installation. Since you are using Mambo 4.5.2.3 Stable, you should use our MACLPlus v1.0.0 for Mambo 4.5.2.3.

Well, this is exactly what I've done ... I don't know if other components or mambots or whatever can make MACLplus not working. Or maybe one of my own components has a bad installation ...
Have you ever heard of such problems before ?

Thx for your answer btw ...

See you,

=====

Hi Dunn Khan,

Which components or mambots you have installed in your Mambo? May be we can help you to solve the problem.

Mambots :
MOS Image
Legacy Mambot Includer
Code support
SEF
MOS Rating
Email Cloaking
GeSHi
Load Module Positions
MOS Pagination
No WYSIWYG Editor

Components :
Banners
mambatStaff
Mass Mail
News Feeds
Polls
Simpleboard Forum
Syndicate
Web Links
Xprogramming

Hope it will help ! :)
BTW, i think that i'll try to install a more recent version of Mambo in order to use this component if there's no solution ...

See you,

=====

Hi Dunn Khan,

Your problem might be caused by mambatStaff or Xprogramming. We will confirm to you later.
