## summary and article different access level?

Posted by rapereira - 2008/07/08 04:36

---

:dry: Is there a way to show the "article" summary/intro to all access levels, but have the full article (from "read me" link or title as a link) available only to paid access level subscribers? I am a novice with JACL, Joomla1.5 and Community Builder and any help will be greatly appreciated. I would like my menu items to take all subscribers to the section/category where the articles will be listed including summary, but only certain access level subscribers will have access to the full article.

If this is very basic I apologize. I am struggling with many aspects of this development and have not found this information in any of my searches to this point.

If I have not made this clear please let me know, and I will do my best to be more descriptive.

Thank you for any and all help.

Richard

Hi Richard,

I don't think it's a novice question, but a real how-to question. I'm also wondering how to achieve the same result. Unfortunately nobody has answered your question... If anybody knows how to set this up, please help us.

Regards,  
Erwin
