## different users with partlyintersecting privileges

Posted by kugman - 2008/07/21 21:33

---

Hello,

i need help in understanding the jacl-procedure

For Example:

There are 2 Users, one calendar-component and two content-sections.

User1 needs to edit calendar and content-section1 but NOT content-section2

User2 needs to edit calendar and content-section2 but NOT content-section1

How can I realize this?

Thank you for your assistance,

yours

Markus
