
Backend problem

Posted by zotar - 2008/07/28 03:58

Hello,

I use Joomla 1.5.4 and Jacl pro 1.5.4.

Installation is good, I see my webside but there is a problem in Backend.

I write my login and password in site/administrator. I click in "connect" but after the banckend is white.

Please Help me.

Thank you.

I have the same error.

I use Joomla 1.5.7 , I cannot see anything in my control panel. I think JACLP sucks..

The problem is in the file index.js
if(!element.hasClass('disabled'))

the element is null

...

I want my money back!
