
ERROR: Incorrect Username, Password or Access..

Posted by crosslink06 - 2008/07/30 21:03

Hello,
I have installed com_jaclplus_1.0.7 on my J!1.0.15 system. I had an error (<http://imagik.fr/view-rl/81669>). Now I can't login to admin panel. I get the "Incorrect Username, Password or Access Level. Please try again" error.

In my data_base_ I have a new table:
jos_jaclplus

I had also many errors in all the pages of my website so I handed my old files from my backup. Now, it's OK.

Currently, I can log me on the main page but always not in the admin panel... I'd like to uninstall completely JAACLplus.

How to do that, please?
This is very important for me.
Thank you
