## Login problem (J1.5, JACLPlus, CB, AEC)

Posted by frgagnon - 2008/08/14 21:15

---

Hi,

On my setup I am  
Joomla 1.5.2  
JACLPlus for 1.5.2  
CB 1.1  
AEC 0.12.6RC1d

phpBB3 3.0.2

Brigde RC5b2

The order for the plugin in Joomla is  
Authentication - AECaccess  
Authentication - Joomla  
Authentication - phpBB3

.  
.  
.

User - AECuser  
User - Joomla!  
User - phpBB3

The login in Joomla working well.  
The login in phpBB not working.  
the error is Direct Access to this location is not allowed.  
(This message come from JACLPlus file).

So to resolve that, I try inside the file distribution/includes/auth/auth\_joomla.php function loadJoomla15(), I added  
define('\_VALID\_MOS', 1);  
but at this moment I receive many others error like if missing some code.

So you have idea to resolve that?

Thanks

=====
