
can JACL do this ??

Posted by expat - 2008/08/16 02:02

i would an author to be able to publish and edit their OWN articles

can JACL do this?

=====

Modifying the Publisher and Editor ACL's

Posted by expat - 2008/08/16 12:20

it seems counter-intuitive to have editors at lower level than publishers?

can it be hacked quickly to this:

- 1.author: need approval for publishing
2. publisher: can publish and edit THEIR OWN articles

if user is the author then he can edit his own articles??

```
if $user =$author
{
com?task=edit
}
```

3. editors: can publish and EDIT ALL content?

or is there an extension that does this?

edited

Subgroup for Author ACL

can anyone hack joomla for ACL ??

i need a "if" clause for the author ACL

if user is the author then he can edit his own articles??

```
if $user =$author
{
com?task=edit
}
```

??
