No, there are no free versions of JACL for Joomla v. 1.5.x. These guys switched over to "Chartered Membership" and they are using that to hide behind the fact they want to charge for this product now. My guess is that they just want to suck as much money as they can before Joomla v1.6.x releases, since it will have a more flexible ACL. Unfortunately for the rest of us, I think it will be a while before that version of Joomla is released.
