
Can JACLPlus hide the appearance of a menu? Easy?

Posted by MarketMotive - 2008/09/16 09:32

We're using some great features in JACLPlus Version 1.0.15a on Joomla! 1.0.15 Stable.

However, it isn't clear if JACLPlus can limit the appearance of a menu (topmenu tab in this case) to a single access group.

In the admin "Edit Menu Item" I set "Access Level" to Group Z, a highly restricted group with nearly no access levels. Yet the menu tab appears to all users in all groups, regardless of access.

Where can I control the appearance of a menu tab?

Thanks

-Michael
